EXPERIENCE

AI Developer, Glow Talent Sep 2025 – Jul 2026
Remote

- Built a multi-tenant SaaS platform from scratch as sole developer, using Python, Flask, PostgreSQL, and SQLAlchemy with Alembic migrations.
- Shipped a RAG pipeline (ChromaDB, Gemini) and an LLM evaluation engine that converted unstructured session data into structured, scored output.
- Integrated a real-time AI video/avatar layer with webhook-driven session handling and retry logic; later migrated the video infrastructure to add richer in-session controls.
- Designed role-based access control across multiple roles with JWT auth and per-tenant data isolation, and automated QA via a headless-browser-to-issue-tracker reporting pipeline.

AI Developer, Nodos Hub Feb 2025 – Present
Remote

- Built a React and FastAPI analytics dashboard, now in production, tracking student attendance, performance, and risk indicators across hundreds of schools for an education-sector client, with Excel export.
- Owned the full deployment pipeline from GitLab to a cloud Linux server (Gunicorn, systemd, nginx) across separate dev/prod environments, with SSO against the client's identity system.
- Built LLM chatbots (Gemini, Pinecone) in PHP and Python, plus an automated lead-scraping and WhatsApp outreach pipeline using n8n, Airtable, and the OpenAI API.

PROJECTS

ai-document-analyst · research-agent · agent-benchmark
Python, FastAPI, React, Docker

- Built a three-part system: a production-style RAG service with hybrid retrieval (BM25, dense vectors, cross-encoder reranking); a Planner-Researcher-Critic-Synthesizer multi-agent system that composes the RAG service as a tool; and a benchmark harness that measures the agent loop against a single-shot baseline — with CI and tests that run without API keys.

EDUCATION

Universidad de Palermo Oct 2024 – Jul 2029 (expected)
B.Eng. in Artificial Intelligence Engineering; intermediate AI Analyst degree expected Dec 2026

University of Pennsylvania Aug 2023 – May 2024
Full-year exchange, BSE Computer Science. GPA 3.88/4.0, 80% scholarship, completed with academic honors

Escuela Industrial D. F. Sarmiento 2016 – 2022
Electronics Technician. GPA 9.40, graduated Valedictorian (Abanderado)

TECHNICAL SKILLS

- AI / ML: RAG, LLM integration (Gemini, OpenAI, Anthropic), vector search (ChromaDB, Pinecone, Qdrant), multi-agent systems, PyTorch, scikit-learn
- Backend: Python, FastAPI, Flask, REST APIs, SQLAlchemy, Alembic, JWT, RBAC, OAuth
- Frontend: React, TypeScript, Vite, Tailwind CSS
- Infrastructure: PostgreSQL, Docker, GitHub Actions, Git, Linux, Gunicorn, systemd, nginx, Azure, pytest, Playwright
- Languages: Python, TypeScript, JavaScript, SQL, Java, PHP, C

HONORS & LANGUAGES

- Bronze Medal, International Junior Science Olympiad (Qatar, 2019); Gold Medal, National Junior Science Olympiad (2019); 80% University of Pennsylvania scholarship; 100% ITBA scholarship offer.
- Languages: Spanish (native), English (C2, Duolingo English Test), French (A2), Italian (basic).
