## EXPERIENCE

**AI Developer**, Nodos Hub · Remote — Feb 2025 – Present

- Built a React and FastAPI analytics dashboard, now in production, tracking student attendance, performance and risk indicators across hundreds of schools for an education-sector client, with Excel export.
- Own the full deployment pipeline from GitLab to a cloud Linux server (Gunicorn, systemd, nginx) across separate dev and prod environments, with SSO against the client's identity system.
- Built LLM chatbots (Gemini, Pinecone) in PHP and Python, plus an automated lead-scraping and WhatsApp outreach pipeline using n8n, Airtable and the OpenAI API.

**AI Developer**, Glow Talent · Remote — Sep 2025 – Jul 2026

- Built a multi-tenant SaaS platform from scratch as the sole developer, from database design to deployment, using Python, Flask, PostgreSQL, SQLAlchemy and Alembic.
- Built retrieval-augmented generation (ChromaDB, Gemini) and LLM-based evaluation features.
- Implemented role-based access control with JWT authentication, and automated QA with headless-browser testing.

## PROJECTS

**ai-document-analyst · research-agent · agent-benchmark** — Python, FastAPI, React, Docker

- Built a three-part system: a RAG service with hybrid retrieval (BM25, dense vectors, cross-encoder reranking); a Planner, Researcher, Critic and Synthesizer multi-agent system that uses the RAG service as a tool; and a benchmark harness that measures the agent loop against a single-shot baseline, with CI and tests that run without API keys.

## EDUCATION

**Universidad de Palermo** — Oct 2024 – Jul 2029 (expected)
B.Eng. in Artificial Intelligence Engineering; intermediate AI Analyst degree expected Dec 2026

**University of Pennsylvania** — Aug 2023 – May 2024
Full-year exchange, BSE Computer Science. GPA 3.88/4.0, 80% scholarship, completed with academic honors

**Escuela Industrial D. F. Sarmiento** — 2016 – 2022
Electronics Technician. GPA 9.40, graduated Valedictorian (Abanderado)

## TECHNICAL SKILLS

- **AI / ML:** RAG, LLM integration (Gemini, OpenAI, Anthropic), vector search (ChromaDB, Pinecone, Qdrant), multi-agent systems, PyTorch, scikit-learn
- **Backend:** Python, FastAPI, Flask, REST APIs, SQLAlchemy, Alembic, JWT, RBAC, OAuth
- **Frontend:** React, TypeScript, Vite, Tailwind CSS
- **Infrastructure:** PostgreSQL, Docker, GitHub Actions, Git, Linux, Gunicorn, systemd, nginx, Azure, pytest, Playwright
- **Languages:** Python, TypeScript, JavaScript, SQL, Java, PHP, C

## HONORS AND LANGUAGES

- Bronze Medal, International Junior Science Olympiad (Qatar, 2019); Gold Medal, National Junior Science Olympiad (2019); 80% University of Pennsylvania scholarship; 100% ITBA scholarship offer.
- Spanish (native), English (C2), French (A2), Italian (basic).
